

PRODUCT RANGE

MAJOR ELEMENTS N = Nitrogen, P = Phosphorus, K = Potassium, S = Sulphur, Ca = Calcium, Mg = Magnesium

TRACE ELEMENTS Zn = Zinc, B = Boron, Cu = Copper, Mn = Manganese, Mo = Molybdenum, Fe = Iron

PORT KEMBLA

Tom Thumb Rd, Port Kembla, NSW 2505
T: 02 4255 2723

PRODUCT DESCRIPTION

Product Code	PRODUCT ANALYSIS %						eNpower® TRIGGER® Green Urea NV®				
	Major Elements										
	N	P	K	S	Ca	Mg					
Zn	B	Cu	Mn	Mo	Fe	Trace Elements					
						STRAIGHTS					
Nitrogen											
GRAN-AM®	11110	20.5		24.0							
GRANULAR UREA	20065	46.0									
Phosphorus

CUSTOM BLENDS

With the flexibility to include major elements such as nitrogen, phosphorus, potassium, and sulfur, as well as a wide array of trace elements, Custom Blends offer a holistic approach to nutrient management, promoting healthier crops and improved yields.

Nutrient Advantage® soil, plant tissue, and water testing service provides essential insights into the nutrient levels and overall health of the crop environment. It is a valuable tool in determining fertiliser requirements accurately and increasing productivity.

For more information on how Nutrient Advantage® can support your farming operations, visit www.nutrientadvantage.com.au or contact the team at 1800 803 453.

ENHANCED EFFICIENCY PRODUCTS

When applying nitrogen, over half can be lost through pathways including denitrification or leaching in unfavourable conditions. eNpower® is IPFs patented nitrification inhibitor that slows the rate of nitrogen loss, meaning more is available to your crop at key growth stages.

eNpower® can deliver a win-win in some scenarios, boosting nitrogen efficiency in crop to drive productivity gains, whilst simultaneously reducing greenhouse gas emissions by up to 59%*

*Lamb et al. Next-generation enhanced-efficiency fertilizers for sustained food security, Nature Magazine, 2022

** Grace P et al. (2024) Soil Research 62, SR23070. doi:10.1017/SR23070

Humic acid can play a role in improving on-farm nutrient use efficiency by improving soil structure, nutrient retention, and microbial activity, potentially enhancing plant growth and crop productivity in agriculture.

Being highly compatible with other fertiliser ingredients, and having a uniform granular size, TRIGGER® can be included in fertiliser blends.

A substantial amount of surface applied urea can be lost through volatilisation when urea is not incorporated by adequate rainfall, irrigation or cultivation soon after application.

Green Urea NV® slows the conversion process to reduce these losses by up to 93%**, resulting in more available nitrogen for your crop.

**based on IPF field work and studies

DISCLAIMER

WARNING: DO NOT STORE FERTILISER IN SILOS.

The percentages in this product guide are estimates only. The products listed here are subject to change without notice.

Fertiliser can be corrosive to metals. Clean equipment after use and follow manufacturer's maintenance advice. Equipment used to transport and handle fertiliser should be thoroughly cleaned before being used for other purposes.

Please read each specific product label carefully for use directions, and additional warnings (e.g. heavy metals, trace elements, and dangerous goods) prior to using the fertiliser product.

Avoid ingestion and inhaling fertiliser. Contact with the eyes and skin must be avoided and washed immediately with running water. Protective clothing, eyewear, and dust masks should always be used when dealing with this fertiliser product. For more safety directions search the specific product on <https://bit.ly/ChemAlert>.
